

CAREER AT THE MARKET LEADER FOR ULTRASONIC WELDING TECHNOLOGY

The fascinating world of ultrasonic welding awaits you! Herrmann Ultrasonics develops and builds machines, which permanently join plastics, packaging, nonwoven materials and non-ferrous metals by using ultrasonic vibrations. The technology is suitable for various industries, such as Automotive, Electronics, Food and Hygiene. With 520 employees in 4 Headquarters and 20 Tech-Centers, we have a global presence in 18 countries. Apply today and become part of our international team.

Sales Engineer (m/f/d) for Ultrasonic Welding Systems ASEAN

You develop relationships with established and potential customers and build up an industry network in Malaysia. You make technical presentations and demonstrate how our products will meet clients' needs. Furthermore, you manage and interpret customers requirements and deliver meaningful and frequent feedback to German headquarter.

What makes us unique:

- Laboratories for PLASTICS, PACKAGING, NONWOVENS
- In-house training academy
- Owner-operated
- Attractive salary package including bonus potential
- Appreciations for person, process and planet
- Flexible work schedules and salary models
- Take up and implement ideas and trends

What distinguishes you:

- Bachelor degree in Engineering or related field
- Minimum 3 years work experience
- Background in manufacturing industry
- Ability to manage daily activities in the sales territory
- Hands on mentality, willing to create and develop
- Ability to comm. with the team Thailand, Japan and Germany
- Residence in southern Malaysia

Our Regional Sales Director PLASTICS Asia Michael Boerner is looking forward to your support.

What he likes about his job:

-  Technology leadership
-  Responsibility for innovative high-tech components
-  Internationality
-  Interesting variety of applications

If you are interested in working for us please respond with your full application including CV and certificates.
