Job Description:

As our Bartlett, IL based Ultrasonic Engineer in our PLASTICS division, your primary objective will be providing onsite technical expertise to our customers allowing them to effectively and successfully utilize our equipment. This entails having an extensive grasp of all aspects within ultrasonic welding; maintaining equipment, application development and technical support.

Responsibilities as Ultrasonic Engineer:

- Planning, implementation and documentation of machine and Ultrasonic Equipment commissioning including Factory Acceptance Testing, Site Acceptance Testing, and customer personnel training
- Planning, implementation and documentation of all Ultrasonic Welding Application Development and Service Assignments
- Providing technical assistance to customers including phone/email support, on-site, and in-house customer visits
- Providing application and/or technical clarification for the integration of ultrasonic welding equipment provided to internal & external customers
- Utilizing the CRM system for tracking customer activities, projects, quotations and follow-ups
- Release of ultrasonic welding equipment tools and machinery prior to delivery
- Assuming emergency and stand-by services including provision of shipping and or delivery of spare parts
- Travel up to 50% within North America

Required skills:

- An Associate/BS in engineering / technical for electrical or mechanical field is required.
- Mechanical and electrical skills are required.
- Experience in servicing and troubleshooting of manufacturing equipment preferred. Consideration given to candidates that can demonstrate they have considerable mechanical and electrical knowledge
- Proficient in Microsoft Outlook, Word, Excel and PowerPoint
- Ability to give technical presentations and conduct technical training and seminars
- Additional language skills a plus (German, Spanish)

Qualified candidates, please submit your resume with Ultrasonic Engineer PL in the subject line to: jobs@herrmannultrasonics.com
